

OTA Travel Router Guide:

1. Power up the router (takes about 2-3 minutes to fully power on)
2. Connect your phone to the USB port using your iPhone cable
3. On your phone, unlock and when prompted to trust the connect, press "Trust"
4. If this is the first time connecting your phone, you will need to log into the router to enable the tether
5. Connect to either the "OTA-Tether" SSID or connect via hardwire connection
 - a. SSID: OTA-Tether
 - b. Pass: otatether
6. Open a browser to <http://192.168.8.1> and log in
 - a. Pass: otatether
7. On the internet page, in the "tether" window, press connect for eth1

8. Once connected, you should see a page similar to this which shows the IP Address, Netmask, Gateway, and DNS Server, as well as an Orange Disconnect button on the bottom.

9. On your phone, you should see the green tether rings appear near the top left of your device where your cellular service is shown to the right of it.
