Palladium
Button 1 - Room On (100% every load)
button 2 - Low (dim loads to 25%)
Button 3 - Shades
Button 4 - Room or Area Off

Create Time Clock Events
Exterior On - Sunset
Exteror Dim - 1.5 hrs after (25%)
Exterior Off - Sunrise

Interior On - Pick Chandeliers seen from street and turn on at sunset
Interior Dim - 25% dim

Shades open (common area shades, not bedrooms) - 30 minutes after sunrise
Shades Close (can include bedrooms)-30 minutes after Sunset

Art Lights - Turn on and adjust throughout day. They can turn off with Goodnight and Away buttons.

Water Closets that are separated from bathroom
Button 1 - On
Button 2 - Fan
Button 3 - Night Lite (make reverse logic led - light level as low as it goes)

All exhaust fans should start a timed sequence to shut off 30 minutes after turning on if toilet, 45 minutes if shower.

Adjust lower level Trim on lights - using iPad app, adjust to remove any flickering. Device-Light load-Edit-Trim-LowEnd Trim-adjust-test-save

Other programming Ideas
-Create an Evening Button (turn off harsh lights and dim decoratives, wall wash, art and cans (if they are only light source). Set levels to 25% and fine tune. Do this for the surrounding areas. Ex: Family Room - dim those lights along with Kitchen, hallway, nook (whatever areas will be seen from watching TV or reading)
-Create a movie button if there is a Media Room or Theater. Turn off lights, lower shades, maybe ambient light left on at 5%.
-Create an Entertain Button- Similar to Evening but usually used in a RecRoom/Bar area. Make a relaxed setting but highlight activity (Billiards, Dart, ShuffleBoard, Wine, Bar).
